

Lip Extender Instructions

The Lip Extender is an add-on accessory that extends the lip at the bottom of the entrance catching and redirecting 'misses' back into the globe - it also acts as a holder for the optional Fence.

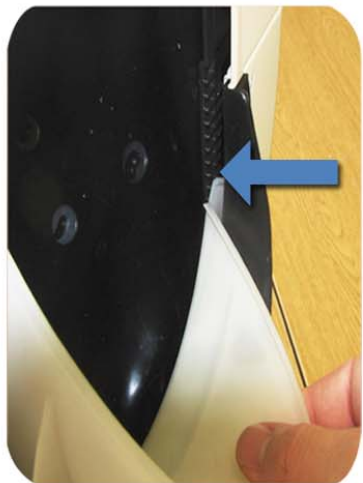

1. Insert Extender sideways into opening.

Tip: Spray Windex on rubber lip for easier assembly.

Note: Lip Extender shown in lighter color for pictorial clarity. Standard color for Lip Extender is Black.

2. Rotate Extender with flange starting to overlap Rubber Lip.

3. Make sure tab is between Guard Lever and Liner.

4. Rotate and position Extender so it is even. Extender flange should start to overlap rubber lip.

5. Push down.

6. Make sure Extender tabs lock in beneath the upper Globe flanges (both sides).
