# Installing the Feeder-Robot Battery

Feeder-Robot can be equipped with a backup battery (sold separately) that provides approximately 24 hours of operation in power-saving mode if power is interrupted.

**Note:** When power is interrupted, the unit will automatically switch to battery power and a blinking yellow light will illuminate the Power button on the Control Panel. Feeder-Robot will switch back to household power when it returns, and the unit will begin recharging the battery.

## How to install

**1**

- Press the Power button ⏻ to turn the unit off, then unplug the unit.

**2**

- Gently turn the unit over to access the battery pocket on the underside of the base.

**3**

- With the use of a Phillips screwdriver, remove the two screws at the bottom of the unit and lift up the plastic cover.

**4**

- Connect the battery, making sure to connect the leads and terminals correctly: **RED lead to the RED terminal** and **BLACK lead to the BLACK terminal.**

**5**

- Insert the battery into the pocket.
- Reinsert the plastic cover, inserting the small plastic tab first to ensure the plastic cover sits flush.

**6**

- Attach the plastic cover using the screws provided.
- Plug the unit back in and power it on. ⏻
