Press and release the **Empty** button to start an empty cycle (empties all litter into the waste drawer).

If already cycling, press **Empty** to pause; press again to cancel a cycle.

Press and hold, while at the home position, to enter night light setting mode.

Press and release the **Reset** button to reset the cat sensor. (Do this after emptying the waste drawer, adding litter, etc.)

If already cycling, press **Reset** to pause; press again to cancel a cycle.

Press and hold, while at the home position, to enter control panel lockout.

Press and release the **Power** button to turn the robot ON or OFF. The robot will begin a clean cycle when power is turned on.

Press and hold, while at the home position, to enter wait time setting mode.

Press and release the **Cycle** button to start a clean cycle.

If already cycling, press **Cycle** to pause; press again to resume a cycle.

Press and hold, while at the home position, to enter sleep mode.

Press and release the **Reset** button to reset the cat sensor. (Do this after emptying the waste drawer, adding litter, etc.)

If already cycling, press **Reset** to pause; press again to cancel a cycle.

Press and hold, while at the home position, to enter control panel lockout.

Ensure proper placement

If possible, place the Litter-Robot in the same location as the old litter box (at least during transition).

Make sure the unit is indoors on a firm, level surface and in a cool, dry location.

Place litter mats or rugs in front of the unit.

Add litter until it meets the raised fill line when spread flat (8-10 lbs or 1 gal). Be careful not to overfill.

Insert the small plug end of the power cord into the socket on the back of the base.

Plug the AC/DC adapter into a wall outlet.

Press the Power button on the control panel.

The **Litter-Robot Connect units only — look for the WiFi symbol on the control panel.** Download the Whisker app and follow the onboarding instructions.

Use clumping litter or litter beads and crystals that are small enough to pass through the screen.

Add litter until it meets the raised fill line when spread flat (8-10 lbs or 1 gal). Be careful not to overfill.
